## Weak Links

By Charles Bernstein

Every day. Day by day. The hours hang and the headlines punctuate a passage through time that we move through, head bowed at the collision of flesh and indoctrination. Yet there might be (might there be?) some doctrine to get us out of this vicious circle of self-enclosing artifacts that we call news, as if the world was already lost before we could speak a word to it.

In Hannah Weiner's *Weeks*, the daily bite of world-event narrative achieves the grandeur, perhaps the quiet desperation, of background music (ambient ideology). *Weeks* is an unnerving foray in a world of prefabricated events: a world we seem to have fallen into, as if from the cradle.

*Weeks* was written in a small notebook, one page per day for fifty weeks. Each page of the book is the equivalent of a single week, with each day taking its toll in about five lines. The material, says Weiner, is all found – “taken at the beginning from written matter and TV news and later almost entirely from TV news.”

Here parataxis (the serial juxtapositions of sentences) takes on an ominous tone in its refusal to draw connections. *Weeks*, in its extremity, represents the institutionalization of collage into a form of evenly hovering emptiness that actively resists analysis or puncturing. In *Weeks*, the virus of news is shown up as a pattern of reiteration and displacement, tale without a teller. Yet, while Weiner follows a strict poetic method of refusing the “lyrical interference of ego,” the result is that these deanimated metonymies take on a teller, as if to call it “Hannah.” This is the vortical twisting, or transformation, at the heart of *Weeks*' prosodic inquisition.

*Weeks* is poetic homeopathy: a weak dose of the virus to immunize our systems—let's say consciousnesses-against it.

What do we make of our everyday lives: make of them, make out of them? What do we make of, that is, these materials that we can no where (not anymore) avoid, avert our ears as we do, or, as in poetic practice, hide behind the suburban laws of laundered lyricism?

Weiner's *Weeks* is a shocking cul de sac to a tradition of the found in American poetry—a tradition that includes, by any brief accounting, Charles Reznikoff's *Testimony*, Sterling Brown's ethnographic encounters with the black oral tradition, William Burrough's cut-ups, Jack Spicer's “received” poems, Jackson MacLow's processing of source material, or Ronald Johnson's erasure of Milton in *Radi Os*; not to leave out Weiner's own *Clairvoyant Journal*, where what is found is the words seen (projected? transferred?) onto the objects and bodies surrounding her. Cul de sac not in the sense of “no more to be found,” any more than no more to be lost. Only that in the world of *Weeks* there's no way out and ascent upward is effectively blocked, since *Weeks* presents a world in which “I went by [can only go by] the information I received,” i.e., not very far. What's left is to descend into this world of “our” very own making, to attend (to) its forms so better to reckon with it. “The standoff began as a botched robbery.”

By 1976, with the AIM leadership in exile or facing interminable trials and with the organization's ranks thoroughly decimated, the FBI dismantled much of its Rapid City effort. Was assigned to the Rapid City field office once again in 1982, during the height of the AIM confrontation with federal authorities concerning the occupation of Yellow Thunder Camp in the Black Hills...a sign that the possibility was there.

What kind of financial problems have you been facing Now we have  
independent committees around the country and there is a lot  
of activism of all types There isn't the need for AIM to go

Time is running out and I need some answers Recently our Building lost one of its leading citizens, Miss Bea Kinn, who lived in apt 13c since our Building first opened They say you were involved with this thing, the S.S. We won't forget about you if you've committed murder, mass murder, or terrorism Test them all before you sell them This is the 100th day of this year US ships are steaming toward Libya But how far Cerezo will go in opposing Reagan's regional policy remains to be seen The bruised and battered body of Beatriz Eugenia Barrios was found 2 days after the Dec 8 presidential election The tenants barricaded themselves inside I think we can keep it going almost indefinitely and so can Libya We on the Board are planning to make extensive, necessary and long overdue repairs and replacements to the Building's roof, façade and exterior wall The blue wall of silence Spur of the moment—I'm impulsive myself Don't worry I've got the 20 grand I know kidnapping is a federal offense but what other choice do I have Everybody makes mistakes I am so tired of talking, aren't you And then I'll thank you for it afterward No one takes the thought of a major chemical leak lightly He has not come clean about his days in the German army They made such statements apparently to save their skins You have yourself to blame because you were not more candid How they use their money, funding cultural institutions Hopefully it was an isolated case The common market nations urged restraint on all sides NASA hopes that this will provide the crucial clue about the rocket booster's leak There's a great deal of voter apathy Simone de Beauvoir died today at 78 They oppose the plant calling it environmentally unsound Planes strike at Libya There is a price to engaging in terrorism around the world One F111 unaccounted for I don't think it's going to achieve as much as the administration hoped for Among the dead, the baby daughter of Qadaffi Libya launches two missiles at a Coast Guard Station in Italy We chose the ones we could identify the easiest

We've seen him stand up He's alive, he's well and he's inside Libya Do you think we can get out of this without the overriding support of our allies I'm not ready for my life to end now, I'm a little scared about that I would say the rules are changing in Libya So what are you going to be doing about Saturday night Then and only then can you put grace and beauty into what you do Three Britons killed, one kidnapped The pictures show vividly what the pilot and bombardier were after after Unless we get rainfall we'll have difficulty getting through the drier season An American is killed as terrorists retaliate Reagan is a killer of children There is no regulation, it's free enterprise Have these young students learn something they couldn't have learned before In Paterson it's gotten quite serious Does the battle leave the room for a fourth daily paper Except, of course, their need to be free In Milan 15,000 marched in protest I'm not some smart politician One trailer was blown 1/4 mile Remains of all seven astronauts have been recovered. It's the first time he's played in his homeland in 61 years You get some strong guys and ask them to be careful He likes a good quality tone The destruction was spread over a wide area The newsmen see only what they are allowed to see The overlap is not surprising, given thirty years of army rule, and underscores the powerful influence the military continues to exercise in every aspect of Guatemalan life We don't like the standards any more than they do We've been trying to get the government to tighten them Now the children can have what they've always dreamed of, as well as us Vicious tornadoes almost wiped out a whole town Recovery operations for the shuttle's debris are winding down It's sort of a nightmare version of the dating game A piece of matzoh is not any old cracker 21 Libyans are behind bars in England A record 12% decrease in the cost of gasoline Only if Ryan White isn't there The Israeli government says it has no involvement or knowledge of the deal

He wants a new agenda for New York That won't be necessary, thanks She was well aware of my concern over wild-life He counted on America to be passive A nation-wide crackdown on pornography They are not linked to the I.R.A. Not all terrorism is state sponsored It's the court of last resort for the little guy who's been ripped off Collecting the money you've won is the tough part You are one of a hundred with a chance to go The Crying Baby Clinic I let her put herself back to sleep Parts of the Challenger were still being recovered from the Atlantic We wore our rigs under our coats as we took the elevator to the 86th floor We just waited for a red light It's a chance to prove that with planning you can do most anything A court order kept the schools open Here's a man who has lied about a very important point in history The precautions in Tokyo promise to be more elaborate than ever His government is paying up to be prepared ... and the Puerto Rican government on tax matters They had best be prepared for the consequence Most development aid assumes that boosting Third World economics will translate into other basic gains such as improved health, nutrition, education, and a falling birth rate I am especially pleased to run for reelection to the Board of Directors, now that the first year of our co-op has been completed I hope that you will read the enclosed booklet and study the background information and statements of the candidates Dudley is an avid fisherman who says he fishes waters throughout the world as an excuse to travel to remote places How close we came to catastrophe there The lack of good hard solid information Are those two rights on a collision course these days I don't believe you're improving the quality of the information supplied Are the lights shining brighter on the greater white way

This is invisible stuff up there    Folks were just lying around on the grass    This year we have carefully added new titles not previously available to a national audience as well as selecting titles from last year's list of publishers    Does a healthy body mean a healthy mind    The Soviets have vastly understated their losses    We've got nuclear trucking going through our city    Ham radio is always used in the initial stages of a disaster    There is fear of loss of face and world opinion and the space program will go on    We're here on 67th St and Lexington Ave.    That international aid be allowed into the Ukraine    An expert on bone marrow transplant    Perhaps he will offer them access to the American list    The documents were found in the national archive in Washington    A resistance to the hiring of gays on the part of the membership    How do we know some of those haven't infiltrated the police dept.    They're disgracing the job    The crunch comes when the issue goes public    U.S. oil companies or their subsidiaries still pump most of Libya's oil    Radiation clouds dissipating    It was a special day for some special dogs    We'll brighten up your patio, shove a couple of creepers up your trellis    This was Haiti last February    No charge against the former first lady seems too extreme    Nice weather, spring, it's so wonderful    Do you know the name of the astronaut who became America's first man in space    It happened today twenty-five years ago    Will the 49,000 who had to be evacuated from the area ever be able to go home again    That's something I can't give any credence to without a professional evaluation    A mother and her 13 year old son were both selling drugs    This is holocaust remembrance day    How big a ransom did the letter ask for

You cannot see the laser beam but you can see the results He insists he'll be found innocent when he goes on trial next fall But for the oldest of our city's immigrants the dream was long ago and far away But as times change so do immigrant communities The roof of a second reactor evidently did catch fire It has to be smothered and that may take several weeks We don't want food irradiation in NYC The defendants deny any wrong doing The police believe the killer knew the woman and the wooded area The fire in the reactor appears to be out The Soviet harvest of wheat is expected to be 5-10% short I think the problem now is water contamination The senate acted in a very radical way It was rainy out and the street was slick at the time of the accident That burger you had for lunch may give you more than indigestion You get two games for one buck but you gotta be in it to win it Coney Island Hospital is being evacuated because of a fire in a generator An army colonel is accused of murder and torture in Haiti The city is a much more attractive place to make an investment He knows as much about lie detectors as anyone Nervousness has absolutely nothing to do with the examination Richard Nixon, probably the most dishonest man I ever met I don't agree with some of the decisions he made in the Supreme Court but he had the guts to make them At the present time we are running more units than we normally run on a Monday I feel very bad that he's not around here to give his side of the story One plant worker was expelled from the Communist Party Fletcher predicted it won't be long before we're flying again In my opinion the aforementioned financial statements present fairly the financial position as of December 31, 1985, and the results of its operation for the period then ended in conformity with generally accepted accounting principles A warning to stay away from certain imported foods

She's a latchkey youngster, home alone after school The Yonkers school board asked for four years to integrate, but that was turned down I will review whatever options exist We have to continually offer something new It's a two-fold issue, jobs, housing and crime The job is 40 days ahead of schedule The complications may not be worth the risk The problem of dental implants all along is to find material to bond with the bone If you want to get a good night's sleep it is suggested you hold your baby more during the day If you don't act please think of all the people you'll be writing off A dramatic rescue on a frozen Oregon mountain They saved each other with their respective body heat Emphasize the uniqueness of each of them It costs \$95,000 to raise a child to age 18 Most of the buildings on her block are being rehabilitated The recent news bulletin of the Council on Hemispheric Affairs states that in the three months since Cerizo's inauguration in January, there have been over 100 assassinations and 40 disappearances Ivan, their youngest, now works at the prevention center The kids want to have fun, and to their surprise, they do How the city coped with a million extra people There are obviously a lot of wise drivers in the metropolitan area There was innocent touching without abuse They decided not to buy anything in the white business district He should not have had his bail revoked His memory had changed because he had been intimidated No charges have been filed against the bus driver She wasn't hurt because she was wearing her seat belt He is charged with breaking the law he has sworn to uphold Morning commuters Still faced spotlights run on emergency generators My fingers are crossed but we're working hard Today the Bronx is being rebuilt I'm very sad to leave the department after thirty and a half years Students play a vital role The first question they ask is does it hurt

Now this whole Coney Island is out of order Speech discourteous to the public It begins with checking doctors' competency every few years If she's lucky she may only have to pay a substantial fine Critics say the report goes far beyond just education Troublesome delays for many days ahead After they beat him they didn't have to stab him They were protesting the use of non-union labor on that site They hope they never have to find out how it feels to be in a company town when the company closes up shop 59 people remain in serious condition The baby was absolutely clean, no trace of radiation whatever Despite illness, his collection of May 8 was a triumph A fight over a girl that turned violent Should drugs be used to treat depression The talking treatment is as good as pills May 30th, 1431, Joan of Arc was burned at the stake A few successful films will make all the difference Mass Transit Systems Corporation of Philadelphia has been supplying the Guatemalan government with laser-aimed rifle sights "for several years" according to the company president The beach is enforcing its ban on beer I ran the course several times, both directions When the weather is cool and not hot, there's plenty of water The blast ripped a hole in the street under a parked van The 40th annual Tony Awards Who's to blame for the city budget The annual Puerto Rican Day Parade swept up Fifth Avenue We're making a big impact on the community The Red Sox still lead the American League East We don't believe warnings will suffice Why after all them trees have been there 27 years I am totally committed to the cause of black activism Staten Island—some call it the forgotten borough, some call it the racist borough We don't use contraception as well as we should The stroke of luck that saved his life was an apple tree that broke his fall It only costs \$10 and any superintendent or handyman could install it It now takes 30 seconds to reach an operator compared to the usual 2 seconds Yep, some downright fancy roping saved the day This was grand, it was presidential

Based on the comments that were made, I think he felt overwhelmed by them. He's a jolly pain in the neck, he's a unique personality. Everyone wants to stay around the area. Down on the Jersey Shore we found literally everything. A murder at the Waldorf found the place crawling with cops. The public commentary was just too intense. It's inconvenient to blame the press. Nobody would have been looking around that deeply. The rejections are fairly routine in transplant cases. A soldier who smokes is not a fit soldier. He says today's young talent is among the best ever. The incinerators haven't been working for seven months. Thousands of marchers are expected to converge on Central Park. She knew this but she wouldn't put her out in the street. The real problem is attracting good Doctors to work in the hospital. Infant deaths have declined to record low levels. These four week old cranes think the man in a crane suit is their mother. They shot Salvadorean refugees across the river. It was the first time nuns had been killed. This is between opulence and misery and misery is losing out every day. Civil disobedience is a way of nudging the law along. The people of El Salvador have a well founded fear of persecution. Let people want only what white people want for themselves. It's over 130 persons per month that are being killed over there. Released after an Amnesty International letter writing campaign. Discouraging the wild scene familiar to Rock and Roll concerts. Now 2/3 say they'd like to see nuclear power phased out. She doesn't want her children to watch her suffer anymore. Would a living will have helped in this case. There was definitely a financial crisis in the town. If you have any complaints write to the State Banking Authorities. I called the Lotto seven times to make sure. Are you going through mid-life crises. Our prime mystery was why marsupials—the mammalian subclass that includes kangaroos, wallabies, and koalas—were found in Australia and South America, but, except for the opossum, not in the Northern Hemisphere. Getting nominated to the Supreme Court is the culmination of a dream, of course. They considered the grandstand unsafe.

The huge fire started suddenly and spread quickly Yesterday New York's highest court reinstated the charge She must receive constant psychiatric care while incarcerated To put it bluntly, Mother Superior has had it This report concludes that violent pornography leads to sexual violence There will be no labor day parade this year The Cyclone is finally running again after an insurance crisis shut it down The court was, to a certain extent, sympathetic It was the most serious attempt to infiltrate Israel in over a year Inside are two million bitter and frustrated people A link between stressful social environments and tobacco Those are the folks who have an allergy to fresh fruit You could be in shock and dead in two minutes Taking a logo and making it huge is very 1980s pop The laughter really rocks the theater Whatever it is that we do easily and well is often the least interesting part of our lives As she went through customs in Chicago, she was held two hours, and was searched and harassed by customs officials who called her a "subversive" A main theme of the demonstration was to protest the rising cost of living and the government's new economic package The seven person crew doesn't have the money They say he's paralyzed from the neck down He's armed with a gun, a small silver gun It's a miracle that they made it An earthquake rocks Southern California, the second time in a week The forty-three-year-old senator overwhelmed his competition Illegal aliens are eligible for Medicaid New Jersey ranks fourth among the fifty states in the number of AIDS cases Most democrats like to sleep in their pajamas and make love to their husbands while republicans prefer nightgowns and watching TV Today oil prices were on a new plunge The lightweight, million dollar aircraft stayed aloft for almost five days AIDS related discrimination will not be tolerated I didn't need Bernard Goetz to promote my career A lot of people on Manhattan's East Side think their busdrivers have gone mad

Anybody can go into the pay phone business We will never stop drug availability in this country by law enforcement measures alone We should exert that force in terms of morality Talks will resume without any preconditions 40,000 tons of uncollected garbage With this drug doctors can use the patient's own bone marrow Aerobics are being presented here as a national sport We need more hospital beds for psychiatric patients This is an extraordinary bipartisan effort Fairness will be in the eyes of the beholder Some businesses pay no tax at all The pilots who will carry the Bolivians into action carry hand guns The garbage will be picked up, starting tomorrow The rich and famous are gathering at Cape Cod The Hispanic World's Fair has been around for eight years You don't allow yourself to be as open and friendly as you would like to be You're not getting older, you're getting better GAM leaders told Cerezo that they do not expect him to investigate the whereabouts of the 40,000 Guatemalans estimated to have disappeared during the past twenty years, but are demanding the investigation of some 850 documented cases that took place between 1980 and 1985 Black unions have already paid a heavy price Swimmers in their eighties were competing stroke by stroke More than 500 movies have been captioned for the hearing impaired It was a revolution in crime busting Rock 'n Roll is now Rock 'n Rap Mrs. Abzug was in the middle of a political campaign when her husband of more than 40 years died Making this film was like going to a party, you just sat around and created this little world On this day in 1899 Ernest Papa Hemingway was born in a suburb of Chicago The law just went into effect a year or so ago Today the place was virtually wall to wall with cops Can you inflict injury Can you attract attention Did you know that consumers bothered to redeem only about 4% The drug itself seems to be winning the war He killed the child with his bare hands Crack had its genesis in the Bronx in 1984 Neighborhood activists continue to press their case

I've got some sources for impossible things Lucile Ball was born 75 years ago today The District Attorney's office got involved when friends of the family suspected foul play We mean to have a drug-free country and the whole world should know we mean business This is the Catholic Church declaring war on drugs, more specifically, Crack If anyone tests positive on drugs they will receive counseling We wish her continued speedy mending The life in Russia is very hard—you can't know about this life Reagan says he's flattered by all this It's the first tornado to touch down in Providence in 12 years He says nothing can be done while innocent people are being held hostage They were held for an hour before being released There were 46 bee bites per square inch on his body The alleged driver was a fourteen year-old girl Once again the alleged buyers had their cars impounded Crack has triggered a crisis in the city jails The murder of an elderly woman in the Bronx has some people frightened It will never sink the Intrepid She's here to stay President Reagan completed his two hour urological exam with no problems There are 40,000 of them, and they're not at work Every retired police officer is ready still to protect the public They're cutting back on funds for everything The air raid was Israel's sixth attack on Lebanon this year Back to the bargaining table tonight for NYNEX Each family here has contracted to buy a 3 bedroom home for 51,000 It isn't much—there's no electricity and no water It wasn't meant to be that way and it's bad for the country in the long run Traffic in both directions is still very slow There are quiet zones in every borough He comes up with a new idea almost every month The rain is too late for most of their crops I give you my promise, the nation will see the farmers through Another New York institution is pulling out of town and taking its jobs with it It agreed to a refund settlement last week Don't mix politics with the bench It's called Taking Back the Night

The whole of City Island wouldn't make one midtown block  
I went to sea for forty-three years The contra issue was the  
tough one The House has kept on challenging what the president  
wants It's beginning to look as if they started their journey  
in Europe They're using all the old familiar tools We're using  
high tech to get a better edge on the fire situation They played  
to a packed house The kids today are different The U.S. and  
Mexican presidents promise more cooperation in stopping drug  
trafficking Saying no is a big decision One would consider  
them professional people Eight million homes in this country  
may contain deadly levels of gas A teenager robbed his own  
mother and then murdered her to get money to buy Crack Had been  
raped, then strangled with a narrow cord The transit authority  
is scrambling not to take the blame They have enough votes to  
beat any veto They want to be here to do what they can to help  
Selling it should bring a very tough sentence Police, firefighters,  
and many others on whom we depend have become addicted to Crack  
Nine movie companies have called They want film rights to the  
story The shooting occurred a little after 3 A.M. Police believe  
she tried to fight off her attacker They knew little about  
the dance and the shooting The watches and warnings have now  
been extended They said out there it couldn't be done It's all  
in the interest of fairness People with large families will come  
out ahead We will help break the bond of that cruel apartheid  
It veered off the road and hit the fence and came through Their  
ordeal is not yet over The fire was just too big No matter  
where you looked, no music, no parade America should be certain  
we will fight it, and it will never win Nearly a million dead  
fish washed up on the shore How are the people who are still  
alive coping Actual mid-air collisions—24 There is a slight  
hope some may still be alive These young men are freedom fighters  
in every real sense Over the weekend she got one in Chicago  
Goetz could get up to 25 years in prison if he's convicted—  
attempted murder

You're dealing with people who already have preexisting conditions  
I tell you plainly, and I tell you simply, there is a Mafia in  
New York City The case expected to wrap up sometime next week  
She wore her signature color, yellow for liberation It took  
three days to put this Hollywood concert stage together It did  
get out of hand last night The police just stood by while  
violence took place The fifth bomb in ten days tore through  
a left bank store And of course he is the son of the late  
Robert Kennedy and Ethel Hirshfield says in his heart he's a  
democrat Only 6% said they'd leave a loving man who couldn't  
satisfy them sexually The drug is called AZT—it is now the  
drug for AIDS Witnesses identified two men at the scene  
For some reason, the trains are very late My mother died gravely  
and bravely and peacefully Employees deny it's a deliberate  
slowdown She's the most wonderful actress I've ever worked with  
in my life There is considerable potential for progress To  
the Soviets the real issues are arms control and Star Wars  
Helplessness, even at the highest levels of the French government  
We share a love of beauty and of art The federal government  
stopped building housing Part shrewd diplomacy, part sentimental  
journey East and West can say yes to each other for a change  
How long it's going to take to resolve this case, I don't know  
We continue to be inspired—we continue to be encouraged  
Autumn is upon us You don't want a chili that's too dry or too  
soupy Conservatives are urging that there be no summit The  
Stockholm meeting was designed to reduce the risk of war It's  
going to be a tough trial and maybe a long trial I got to be  
gracious and she got to be guilty Never a cheap shot—always  
something so full and rich I was pretty ill for about a month  
in the hospital The tragedy of infants born addicted to Crack  
They have signature jackets 40% off at this store He was buried  
with full military honors Some children have been waiting up to

For the third day in a row, road blocks are up and doors are locked  
She said she'd rather die than incur the pain, and the court  
agreed with her It could be called the garbage war The whole  
New Jersey shoreline is being affected Now if you want to be  
corrupt, you've got to lie about it They might argue they were  
forced into this, and be cut loose We came here for quite a  
different reason, which was to get jurors who are totally objective  
He went undercover and infiltrated the operation We've just  
shut down a million dollar a week business Traffic is going to  
reach the saturation point Everyone arrested for drunken driving  
goes straight to jail Both men are noted for their conservative  
views and are expected to pull the bench to the right for years  
to come Princess Diana says she has a brain the size of a pea  
but she was smart enough to marry Prince Charles So far it's all  
leads and no killer yet In his veto, Reagan said sanctions would  
actually leave thousands of blacks destitute Patricia's friends  
and family have only their memories About 60% have found other jobs  
He's looking at the future site of a new condominium This bill is  
fair Tutu said Reagan will be judged harshly by history No one is  
sure just how the economy will react Just what is the best  
way to pay off the family mortgage The Soviets stopped nuclear  
tests 13 months ago Police say more than 60 people have been  
killed Israel has managed to retaliate There was no official  
record of the stops in Israel I think this is a victory for  
diplomats Chambers showed very little emotion at the court  
hearing Couples are marrying at the lowest rate in nine years  
They are making progress against urinary incontinence Hot fresh  
bagels come rolling out of the ovens No pictures of the little

paralyzed from the neck down and it looked like he would not survive  
The senate overruled the presidential veto The sanctions will go  
into effect in 90 days Miami was their first stop in America  
The survival from breast cancer is improving When it works it  
gives children access to both parents The major trauma is what  
happens after the divorce I think the hardest thing is when I  
hear arguments It was a tragedy really for two families I come  
from Hitler's Germany, we had to leave it after seeing the Synagogue  
go up in flames Most kids in today's world have used drugs

children do worse than tall children on intelligence tests The  
pain can be life-long and severe Pick apples that have not been  
sprayed with chemicals I just feel overall they have the best team  
in baseball The new book sizzles with tidbits about his life  
This case could go on for years, don't you agree It's been  
part of the pageant since the 1920s I'd really like to be a talk  
show hostess My gosh, it didn't hurt These youngsters are  
involved in farm activities

All you had to do was have the money, the Crack was there to be bought You have to say no and you have to turn in those trying to sell I understand there was a suicide pact but one boy changed his mind The broadcasts seemed to have produced an opposite effect It's rare to see a wedding of this size They killed my husband, they killed my husband, he was an honorable man More government opponents were arrested For the first time in this case there is real optimism They fear dealers will be back in the schoolyard before classes tomorrow It's a scary feeling to think I just don't want to live anymore By getting a good job, you can make a better future, right I've seen pictures of your mother, big square jaw, strong looking woman I felt a little bit trapped in that town, I wanted to get to the city In those days you didn't tell people you were living together Solidarity has no illusion that it will be allowed to speak out openly Richard was an incompetent, bumbling agent I assume that she had been badly beaten, somehow She still has the support of the Filipino people I think everyone in my family is a closet writer You can really relate to some of his problems There is that delicate matter of who will sing the song The Soviet proposals remain on the table Are we disappointed because we expected too much The death toll is climbing toward 900 in San Salvador's quake Game five will be played here in New York I feel in New York anything is possible so don't count your chickens Fortunately no bomb was found and services resumed Queen Elizabeth was escorted on a visit to the Great Wall of China Now there is a new drug that will keep the babies inside the mother longer Women over fifty want companionship 22 years ago Martin Luther King was awarded the Nobel Peace Prize Heart attacks are down 25-30% He would rather stay here—he finds it a little quieter and safer The mood here was pretty grim the first few months of this year One of the West Germans invented the electron microscope Each year 10,000 people die of influenza In older people this gland shrinks and disappears

New York's hottest stars were so tired they could hardly raise a fist in victory All of the family reunion begins in an hour and six minutes Most of those injured were Israeli soldiers who had gathered at the Wailing Wall Muscular dystrophy affects boys almost entirely What do you do if you have to make bail Day one is still a whole day away Many people are seeking tickets at very high prices We want to try to rehabilitate him physically as much as possible At least four people on the ground were killed in the Israeli raid Chuck Berry is still rockin and rollin with the best of them Everybody's in the ball game It's the big things they're worrying about The canoe was recovered about midnight It doesn't have to be a formal prayer: "Dear God, cure Ken" I was offered \$600 for my press pass The ninety-ninth congress voted for historic change It's probably energizing About 40 people climbed on stage to protest Soviet intervention in Afghanistan The Soviet Union expels five American diplomats The reason given was unlawful activity They are still pushing for progress in arms control This technique is for grossly overweight people The owner of Economy Candy tells us he was born in the backroom of this candy store Cars are being stolen there at a record rate Death was the only cure he could find There's not a support network for gay men It's the only hand operated scoreboard in the American League Their first choice, the Hotel El Salvador, collapsed in a strike back at the Kremlin The visiting team has won all three games No word on why the helicopter went down today Our alternative is to renovate abandoned buildings It is the worst de-humanizing experience ever They also wanted better access to doctors and hospitals We must start educating our children on how to prevent it

34 people were hurt, none of them seriously Every month, it's more  
It's just getting harder and harder to do it This is it The fans  
were very very good The CIA is looking for a few good men  
If they're already in jail, why go through this Now there's a  
program at NYU Medical Center to retrain the brain Why did the

issue Was there any one guy that you dreaded seeing coming up

A friend of North is quoted as saying they threw him to the wolves  
Police say his son hired a hit man to kill him    Pope John Paul  
arrived in Melbourne, Australia's second largest city    No you'll  
never get her, you're too old    But how can the company know if  
the documents are real, not forgeries    Shoppers appeared very  
cheerful today    The second time delivering 23 tons of arms  
It is inconceivable to me that he is the only person concerned  
in the deal    I think he's in for a dip once the archives open  
up    Bush is in a position of having everything to lose and  
nothing to gain by all this    Should railroad police evict the  
homeless from Penn Station    Neighbors won't miss the drug peddlers  
Let's not forget that there are many other issues that concern us  
Laws have been broken, that must be assumed    Today he defended  
the rights of the aborigines    The land has religious significance  
for these people    There's a growing sense of crisis in Washington  
The arms supply built up gradually    I wouldn't rule out replacing  
any of them    Cary Grant died at 82 of a stroke    New efforts are  
now being made to keep infected blood out of blood bank supply  
A single case can cost \$25,000 in medicine and nursing    Some  
of the most popular toys happen to be the most dangerous    Time  
to start thinking of trimming the tree    The FBI is now involved  
in the manhunt for Larry Davis    New Yorkers say it's an outrage  
They all want to testify but only once    They're crazy up there  
Today Desi Arnez died of cancer at the age of 69    The average  
child finds out about seven that there is no Santa Claus    The  
levels of tumor protein released have gone steadily downward  
Keep a fire extinguisher on hand    One man had a rifle and  
said "Hit the floor"    The church has only 50 members, can't  
replace the money    It can be so many things, it's just the  
imagination that makes the difference    To the real Marilyn  
and to the reality in us all    How is the perspective different

Two people are dead after a bizarre shoot-out in a street in Queens They are willing to pay \$25,000 to get him into custody When it comes to sex what should young ears hear Four of those arrested were army officers There really aren't any anti-cavity foods It would label them as handicapped citizens What drove a fourteen year-old high school freshman to murder Chambers claimed he killed her accidentally in rough sex play It's a terrific way to end the year It looks just like my own teeth the caps are porcelain and tend to last much longer The police have surrounded a housing project It's obvious that the execution of these policies was flawed, and mistakes were made Anything that weakens America weakens Europe, indeed the whole of the free world How could it have happened in the first place Thousands of French students fighting with police and turning the streets of Paris into a battle The house democratic leader disagreed with the President's assessment Republican governors had reason to be jolly Israeli troops shot and wounded a Palestinian youth No president takes kindly to press criticism Is the press enjoying this crisis 45 years ago today Japan attacked Pearl Harbor Otherwise you make it too easy for thieves to attempt a forgery It was an extraordinary setting for an extraordinary story Shultz called the contra connection a mistake There's less political activism on campus The fighting near the border area has died down Almost 1000 small fry were welcome to Macy's this morning I wanted this the most because it lights up in the dark We have methods to modify our treatment so you won't have any pain Where is the benzene coming from, and who's to blame It will be a while before anyone receives a reward for the capture of Larry Davis I'm impressed with his ability to cut through a lot of red tape I think I can never retire—I have to keep working The technique of video is absolutely remarkable He knew the navy would teach him to fly It was a bad case of combat fatigue that forced him to quit
